NOTICE OF ALLOWANCE

Status of Claims

1. The amendments and response to the previous Non-final Office action is acknowledged. Applicants have cancelled claims 34-37, 39 and 41 and added new claims 56 and 57. Thus, claims 33, 38, 40 and 42-55 are pending.

Withdrawal of Previous Rejections of Record

1. The rejection of claims 35-57 under 35 USC 112 1st paragraph is rendered moot in view of the cancellation of said claims.

2. The rejection of claims 33, (35, 36), 38, 42, 45 and 52 under 35 USC 102(b) as being anticipated by Itoh et al. (US 5080917) is withdrawn in view does not teach enzyme granulates coated with the polyolefin of: polyethylene, polypropylene, polybutylene or polybutadiene which also have a melting temperature of between 100-200C°. Nor does Itoh et al. suggest such a composition.

3. The rejection of claim 37 under 35 USC 103(a) is rendered moot in view of the cancellation of said claim.

4. The rejection of claims 33-52 for Obvious Double Patenting over US patent 7,501,269 renders said rejection moot (it is noted that the previous Office action was a provisional rejection over Co-pending application, US 10500144, however, said application since has matured into the noted US patent).

Election/Restriction

5. Claims 33, 38, 40, 42-52 and 56-57 are directed to an allowable product.

Pursuant to the procedures set forth in MPEP § 821.04(B), claims 53 and 55, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104. It is noted that previously withdrawn claim 54 will also be rejoined.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement between Groups I-III as set forth in the Office action mailed on 05 January 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

6. The following is an examiner's statement of reasons for allowance: A careful search of the prior art reveals that while many different enzyme granulates have been

Art Unit: 1656

formed with for instance the substance PEG, said substance is not a polyolefin as claimed. Furthermore, the few prior art references that do utilize polyolefins, such as those in Itoh et al., are not the polyethylene, polybutylene, etc. as claimed in claim with melting temperatures of 100-200C°. These types of olefins seem to be mostly utilized in plastics and as flame retardants although a few have been approved recently for FDA use. Thus, there is no suggestion or motivation in the art to coat enzyme granulates with these kinds of polyolefins and **the allowed claims are claims 33, 38, 40 and 42-55.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SUZANNE M. NOAKES whose telephone number is (571)272-2924. The examiner can normally be reached on 7.00 AM-3.30 PM.
